

Cooling System Material Capability

Category: Coolants
Bulletin No. 01.015
Date: 02/01/01
Replaces: 99.002

Introduction:

The cooling systems in today's heavy duty, light duty, and automotive vehicles is comprised of a wide variety of metals, polymers, and composites. Pencool® supplemental coolant additives (including all Pencool 2000 and Pencool 3000 based products) and Penray antifreeze inhibitor products are routinely subjected to coolant compatibility tests.

Compatible Materials:

- Buna-N
- HDCL Polyethylene
- Hypacon
- Neodrene
- Polyethylene
- Polypropylene
- Polyurethane
- Silicone
- Teflon
- Vinyl Chlorides
- Vinyl
- Viton

Pencool® is a registered trademarks of The Penray Companies, Inc.
