

Need-Release for Mack Trucks

Category: Coolants
Bulletin No. 01.013
Date: 01/12/01
Replaces 99.011

Introduction:

Many people are requesting information about a Need-Release filter for Mack engines. There are two Need-Release filters available for Mack engines, however, despite performing the exact same function as a regular Need-Release, they have different part numbers. The differences in the filters are strictly engineering alterations such as thread size and canister size. Detailed information on Need-Release and the Fill-For-Life® coolant program is available on Technical Bulletin 01.007.

Need-Release Part Numbers for Mack Trucks:

<u>Part Number</u>	<u>Engine Type</u>	<u>Cooling System Capacity</u>
NF-2089-1	Most newer models	8 to 20 gallons (US)
NFC-2090	ESI E-9 and Maxi-Dyne	Under 8 gallons (US)

Need-Release® and Fill-For-Life® are registered trademarks of The Penray Companies, Inc.
