

RTO COOLING SYSTEM CLEANER for ELC & Conventional Coolant

- Specially formulated to remove oil, hydraulic and transmission fluid from heavy duty ELC & conventional cooling systems
- Ideal for removing oil, soot and carbon from EGR coolers and charge air coolers
- Disperses contaminants to prevent them from re-depositing
- Highly concentrated, requires less product for flushing than other cleaners
- Won't harm seals and metals
- Note: Contaminated fluids must be disposed of properly

The Only Effective Way To Thoroughly Clean Lubricant Contaminants From Your Cooling System!
