

# PENCOOL® 4000 Cooling System Treatment

## Nitrite Free, Extended Life Coolant Formula

Penray Pencool® 4000 Cooling System Treatment is formulated for two distinct applications specifically for Extended Life Coolants. It can be used in water-only marine applications as an ELC corrosion inhibitor. Or, it can be used as a Nitrite Free formula used as a booster to extend ELC antifreeze life in heavy duty and commercial vehicles.

### Features and Benefits:

- Ideal for marine and non-glycol (water only) applications requiring ELC technology (4.2% in water only systems)
- Use as a booster to extend antifreeze life in heavy duty and commercial vehicles(ELC, OAT & NOAT)
- Increases corrosion protection
- Protects all metals commonly found in cooling systems
- Protects against cavitation and wet sleeve liner pitting
- Increases uptime, reduces maintenance expense and engine wear
- Passes the D4340 test for aluminum protection
- Yellow in color
- Use PTK 103 for testing in water only systems

Note: Not for use with conventional coolants requiring nitrite supplementation

Part#	Quantity	Net Contents	Container
400016	12/Case	16 fl. oz.	Bottle
400005	1	5 Gallons	Pail
400055	1	55 Gallons	Drum
