

DIRECT INJECTION CLEANING KIT

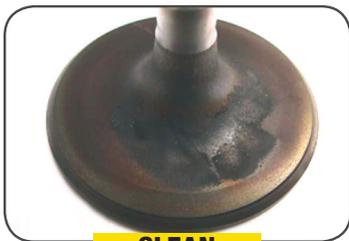

Gasoline Direct Injection (GDI) engines are complex and expensive to repair. A major concern with a GDI engine is ensuring the back of the intake valves are cleaned to remove carbon buildup. The carbon buildup over time reduces engine life, fuel economy, and affects performance. To ensure a GDI or any multi-port gas or diesel fuel system is properly maintained, rely on Penray's Direct Injection Cleaning Kit.

Benefits Include:

- Designed specifically for GDI engines to clean the back of the intake valve and entire fuel system
- Applying Back of Valve Cleaner 2612 through the throttle body ensures the intake runners and valves are cleaned
- The Direct Injection Fuel System Cleaner 2113 cleans GDI, Multi-port, and Diesel fuel injection systems

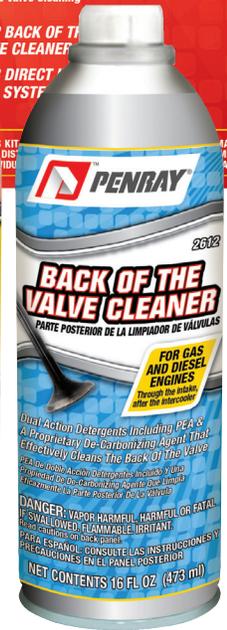

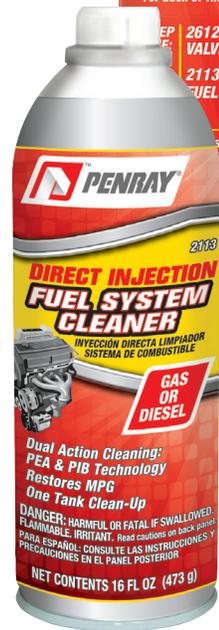

DIRTY

CLEAN

Kit contains: 2612 Back of Valve Cleaner and 2113 Direct Injection Fuel System Cleaner
