

# MOTOR FLUSH

Penray 7501 Motor Flush dissolves the sticky and gummy deposits formed by internal combustion. These deposits cling to vital engine parts inside the engine even after an oil and filter change. After using Penray Motor Flush engine oil will circulate freely to all parts of the engine, freeing sticky valves and rings. (Concentrated formulation is added to empty crankcase for complete and thorough cleaning. After engine is run for 5 minutes, drain Motor Flush, continue with maintenance oil and filter change.)

## Features and Benefits:

- Oil system flush helps remove deposits and sludge formed in internal combustion engines
- Use after draining oil to flush before re-filling
- Frees valves, lifters and rings, allowing engine oil to circulate freely
- Use every 2-3 oil changes for maximum benefit

Part#	Size	Qty/ Case	Container	Treat Rate
7501	1 Gallon	4	Bottle	2-3 oil changes
