FLO-DYNAMICS®

VacFill³™

Coolant Service Machine

- *Fast 5 Minute Service*
- *Vacuums Out Unwanted Air*
- *Easy Connection to Radiator Mouth*
- *Uses Only Shop Air*
- *Clear Hose for Visual Effect*
- *Dual 7 Gallon New Fluid Tanks*
- *7 Gallon Waste Fluid Tank*
- *Enclosed and Protected Tanks*
- *Easy to Operate*

The VacFill³ is faster, more efficient, and the preferred way of performing a coolant drain & fill service.

The old method of drain and fill service requires a lift, sometimes removing shrouds and even breaking a petcock all while taking up to 45 minutes. Flo-Dynamics' VacFill³ eliminates all that! Service can takes as little as 5 minutes, requires no lifts and can be performed on any vehicle.

Simply remove the radiator cap, insert the cone and begin the suction process. When you see no more old fluid coming out, switch to the desired fluid and it fills it to the top automatically. It doesn't get any easier than that!
